

## **GOVERNMENT OF NIUE**

Friday 4 May, 2018. Niue Department of Health

### **Press Release**

#### **NIUE PRIMARY SCHOOL WATER NOW CLEARED FOR DRINKING**

The Niue Department of Health would like to inform the general public that as from Thursday 3 May, 2018, the water at the Early Childhood Education (ECE) and the Niue Primary School (NPS) is now safe to drink.

The installation of a new Ultraviolet (UV) water purification system for the Primary School was completed during the School Holidays. During the first week of Term 2, the water was tested by the Public Health Division to ensure that the system is working properly and is safe for the children to drink from their water taps and outlets within the primary school compound.

Our acknowledgements go out to all the Niue Government Officials who have contributed in one way or another to the procurement and successful installation of the new system. A similar UV water purification system will also be installed at Niue High School, but for the time being, we would like to remind all the parents of the students attending the Niue High School to please continue to boil your child's drinking water until the Niue High School system has been installed, tested and cleared for students to drink from.
